

Freezer Palletizing

The Freezer Palletizing System from Automated Motion utilizes the frost-proof robot from Kuka to provide a complete system that can handle a variety of product sizes at speeds up to 15 picks per minute.

The system is designed to work in cold rooms without requiring jackets, shrouds or heaters.

With easy to use operator interface controls, this system can quickly go to work for you.

Benefits

- *Speeds to 15 picks/minute*
- *Handles up to 180 kg*
- *NO robot jackets or heating required*
- *Frost-proof construction*
- *Temperatures to -30° C*
- *Max Reach 3200 mm*
- *Ultimate Flexibility*
- *4-axis of motion*
- *0.05mm repeatability*
- *Easy to Operate and Maintain*
